Exp:Implement a program on single inheritance.

1. class TestInheritance {

 public static void main(String args[]) {

 Dog d=new Dog();

 d.bark();

 d.eat();

 }

 }

 class Animal { void eat() {

 System.out.println("eating...");

 }

 }

class Dog extends Animal { void bark() {

System.out.println("barking...");

 }

 }

 OUTPUT:-

```
C:\Users\ketan\OneDrive\Desktop\java>java singleinheritance.java
barking...
eating...
```
